

STEM INSIGHT

A unique opportunity for you to experience life in cutting-edge industry or university. Learn about the wide range of STEM jobs open to students and the vocational and academic routes available.

Build long-term partnerships with local employers and universities

Embed careers education and guidance into your curriculum

Enrich teaching with real-world context and examples

Generous bursary funding for your school or college

“ Before the programme I didn't feel I had sufficient knowledge of STEM careers to talk with confidence. Now I am equipped with up-to-date knowledge, real examples and experiences, as well as strong industry links that I can use to benefit the whole school. I believe this makes me a more effective and inspiring teacher. ”

Insight into industry placement,
Alice Kupara, Subject Leader of ICT
and Computer Science

GO ON A PLACEMENT

Teachers are one of the most important influencers on students' career choices but 82% feel they lack the necessary knowledge to offer careers advice*. 100% of participants reported a greater confidence in giving careers advice to students following a STEM Insight placement.
