

To meet HEaTED member requests, we are looking to develop our courses in the Science & Engineering sector. If you or someone you know is able to deliver training in any of the following areas, please get in touch by emailing admin@heated.ac.uk.

Atomic Force Microscopy	Knowledge Transfer on ABI Genetic Analysers
Basic Electronics and Micro Processors	Lab Etiquette
Basic Stem Cell and Culture Techniques	Live Sound Engineering Skills
Centrifuge Training and Maintenance	Marine Animal Husbandry
Chromatography Training	New Generation Sequencing (e.g. illumina)
Electrical Capacitance Tomography	NMR
Engineering – Instrumentation & Measurement	Pharmaceutical Sciences Course
Engineering – Strain Gauges	Protein Purification Methods
Engineering – Tensile Testing	qPCR
Engineering Workshop in General	Sample Storage for HTA License Holders
FACS (Flow Cytometry)	Servicing Spectrophotometer
Geological Thin Section Preparation	Spectrophotometer Training (UV-Vis, FT and IR)
High Voltage Electronic Circuit Design	Theory and Practice of ELISA Training
Immunocytochemistry	Tissue Culture
Introduction to Molecular Dynamics	Troubleshooting Protein Analysis
Introduction to Macromolecular X-ray Crystallography	Working Human Tissue
Introduction to Radiography
