

STAR Centre Itinerary

Group - Evenings - Basic

Key Information

Max Number of Young People:	20
Member(s) of STAR Centre staff:	1
Max Session Length:	3.75 Hour Session (17:00 - 20:45)

Day Itinerary

NOTE: Features included in the event will change depending on the length of time booked at the STAR Centre.

Mission Briefing

Description:

A STAR Centre welcome, followed by a session for you to tell us what you know about Space! Once we've heard what you know we'll help fill any gaps in your knowledge and introduce you to some new ideas!

Cosmodome

Description:

Travel through the solar system and view the planets in a completely new way. Find Constellations in the night sky. Discover the methods needed to find the North Star. Be enlightened with a variety of stories and information about the universe and your place in it.

Mission Control

Description:

Learn the fundamentals of controlling a mission into space. Find out what kind of objects are controlled, and how to achieve a stable orbit. Launch Rockets!

STAR Centre Moonbase

Description:

Travel through space in our specially designed Transit Pod. Dock at our Moonbase and explore the environs. Take your first steps on the moon's surface! Dress as an astronaut and prepare to spacewalk. Help the STAR Centre collect alien samples!

NOTE: The STAR Centre can be flexible with the content of evening events. We can work group leaders to fulfil their requirements.
