

Working in the **community** means meeting people from many different backgrounds. **Vedic maths** is an important part of **Hindu culture**.

This is how to make the Vedic square:

- make a 12x12 multiplication square
- use this to make a 12x12 square of the numbers' **digital roots**.

$$7 \times 8 = 56$$
$$56 \longrightarrow 11 \longrightarrow 2$$

How does this work?

Now choose a different colour for each digit and shade the square.

Describe the **patterns** you can see.
