

Faraday Challenge Day

Team number

Planning and reflections

Stage 1

Draw at least 3 ideas for your prototype and write notes where needed.

A large, empty rounded rectangular area with a green border, intended for drawing and writing notes.

Faraday Challenge Day

Stage 2

Final Design

Draw your final design. You must:

1. Show how the electronic components will be connected on your transfer system;
2. Identify the forces involved in your design.

Stage 3

Reflections

What difficulties or problems did your team have when developing your prototype?

.....

.....

.....

.....

.....

.....

.....

.....

How did you solve these?

.....

.....

.....

.....

.....

.....

.....

.....

What did you do well as a team?

.....

.....
