

# Type the following commands into the Commander window

Over half a million people in the UK use programming skills in their work. These include such jobs as designing and writing computer systems used in industry or for government departments and creating computer games.

**CS** REPEAT 8 [FORWARD 100 RIGHT 45 WAIT 20]

Only include **CS** first if you need to clear the screen from an earlier drawing.

The number of times the commands in the bracket are repeated...

...whatever commands you put in the square brackets get repeated.

Try **changing the numbers** and predict what will happen.

**Special warning:** Logo is really fussy about having spaces between each command or number.

This is the Commander window.

## challenges

Can you change the list of **commands** to draw a **square**?

What other **polygons** can you draw?
