

Biodiversity Improvement method evaluation

Consider each of the biodiversity improvement methods and respond to each question below.

Number	Biodiversity improvement method	How easy is the method to implement?	How well does the method improve biodiversity?	What is the financial cost?
1	Let the grass grow in public areas			
2	Remove invasive species of plant			
3	Add green roofs to all council buildings			
4	Provide bird boxes and bug hotels to all local businesses			
5	Check the quality of waste water from industrial businesses			
6	Install fish ladders			
7	Introduce a licence fee to own a cat or dog			
8	Introduce beehives to local primary schools			
9	Reduce council tax for families who have less than 3 children			
10	Introduce beavers			
11	Plant trees on the slopes			
12	Remove invasive species of animal			

Once you have evaluated all the biodiversity improvement methods work out which will be the best and which you can afford. Use the budgeting sheet to record your choices and explain why you have chosen them.
